The Alpha Bench was designed to have an optional bolt-on logo plate that can have Laser Cut or Decal Logos. Both logo option comes with the bolt-on logo plate which can be added after you purchase a bench, the logo is displayed on both sides. Part of why the Laser Cut logo is so expensive is because we have to make one for each side, most logos take between 2-7 layers of steel laid on top of each other to show detail in the logo.
