Made In Usa	Yes

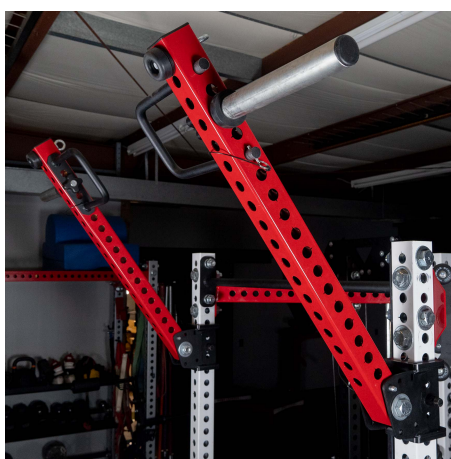

FEATURES

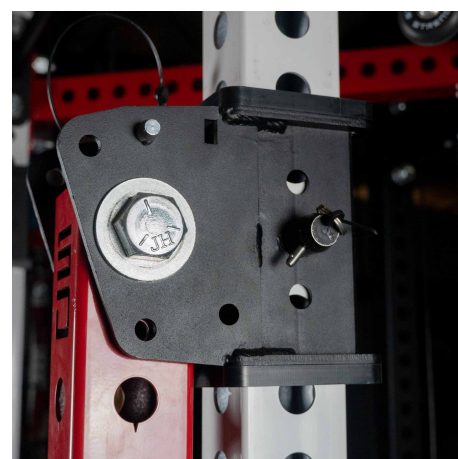

Lever Arms are a very useful training tool that can replicate many machine movements in a rack attachable package. Our Lever Arms can be pinned in so they do not move off the Upright or can be pinned in at an angle for Triphasic Jumps. The weight peg and handle are independent of each other allowing you to change the location of the load independently of the handle. We also have Alpha Arms which can do everything the Lever Arms can do but with the option to unlock for free motion.

Independent Handle and Weight Peg

Can be pinned in

Bracket fits 1" and 5/8" Holes
