The Scap Strap is a Patented design by pro baseball pitcher Jacob Nix that we have partnered together to manufacture and distribute. It was specifically designed to target the rotator cuff as well as the musculature responsible for both internal and external rotation of the glenohumeral joint. The size and versatility of The Scap Strap allows the athlete to complete their entire shoulder program virtually anywhere as they can use a band or cable column as resistance or use as a suspension strap.

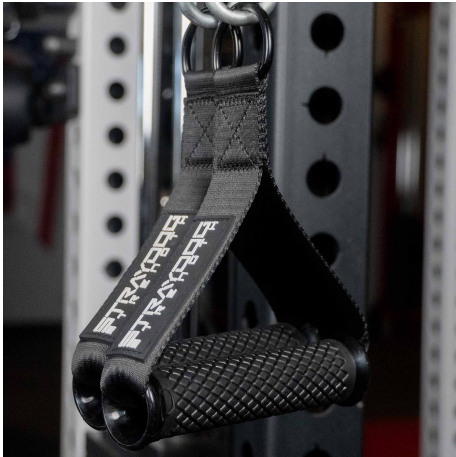

FEATURES

46" Long

Strong Nylon Construction

Rotating D Handles
